CAREER OBJECTIVE

Software Developer with 4 years of experience designing and scaling high-performance enterprise systems using C#, ASP.NET Core, Python FastAPI, Angular, and SQL Server. Proven background in N-Tier/microservices architectures, OWASP-compliant security (Burp Suite, SAST/DAST), and cloud deployment via Azure and Cloud Foundry. Currently transitioning into AI Engineering, leveraging hands-on expertise in Azure AI Foundry, Claude AI APIs, RAG, Agentic AI, and LLM integrations to build secure, end-to-end intelligent applications.

EDUCATION

KONGU ENGINEERING COLLEGE |
BACHELOR IN ELECTRONIC'S
COMMUNICATION ENGINEERING |
MAY 2022 | 8.2CGPA

NACHIMUTHU POLYTECHNIC
COLLEGE | DIPLOMA IN
ELECTRONIC'S COMMUNICATION
ENGINEERING | MAY 2018 | 82%

SKILLS

- Programming Languages:** C#, Html, CSS, Angular, SQL , Python.
- Web Development:** ASP.NET Core, ADO.Net, Entity framework, Fast API, SQL Server, LINQ.
- Tools & IDEs:** Visual Studio IDE 2022, Visual Studio Code, Postman, Burp suite, Kiro.
- Architecture:** n-tier, Microservice.
- Web APIs:** ASP.NET Web API, RESTful Services
- Cloud:** Azure App service, Azure Function, Azure Blob storage, Azure DevOps, Application Insights, cloud foundry
- Additional Skills:** Data structure & Algorithms (DSA), Object Oriented Programming (OOP), GIT.
- AI & Intelligent System:** Gen AI, Agentic AI, LLM , RAG, SLM, Azure AI Foundry, GitHub copilot.

CERTIFICATE

- AZ-900** (COMPLETED)
- AZ-204** (HAVE KNOWLEDGE)
- AI-102** (HAVE KNOWLEDGE)

WORK EXPERIENCE

BOEING, CHENNAI |
Software Developer I
(AEROSPACE & DEFENCE)

MAR 2026-PRESENT

- Engineered and maintained an aircraft component management platform leveraging Angular and .NET structured in an N-Tier architecture, deploying applications seamlessly to Cloud Foundry
- Architected modular features using software design patterns (e.g., Repository, Dependency Injection, and Component-driven design) across separated layers to monitor service schedules and maintenance requirements.
- Achieved 100% component traceability for servicing and repairs by managing version control and CI/CD pipelines through GitLab.
- Implemented secure audit logging to track service history and part modification logs, strictly adhering to OWASP top security standards across data and API layers.
- Streamlined component tracking and maintenance workflows, significantly improving system performance, code maintainability, and operational efficiency across the application tier.

ACCENTURE PVT LTD, CHENNAI |
Custom Software Developer Analyst (Sept 2024- Mar 2026)
Custom Software Developer Associate (Nov 2022 - Sept 2024)

NOV 2022-MAR 2026

(BUSINESS)

- Implemented full CRUD operations using ASP.NET Core with ADO.NET for efficient backend database connectivity and management.
- Utilized Entity Framework and LINQ to perform efficient data manipulation and querying within the application
- Resolved high-impact security vulnerabilities identified through SAST, DAST, and DIYA assessments, ensuring alignment with OWASP Top 10 and enhancing application security posture
- Integrated Large Language Models (LLMs) from Azure AI Foundry into enterprise applications, implementing end-to-end deployment pipelines for AI-powered solutions

PROJECT

GENERATIVE AI PROJECT

Generative AI development project leveraging Azure AI capabilities using .Net

PYTHON API WITH MS SQL SERVER

- Developed RESTful APIs using Python FastAPI integrated with Microsoft SQL Server, leveraging stored procedures for efficient database operations and data retrieval.
- Implemented Generative AI functionality by integrating Claude AI API endpoints to process intelligent responses and AI-powered features within the application.
